## SUMMARY

Web and Hybrid mobile application developer with **4 years** of experience in developing single page applications using Javascript frameworks like Angular JS, Angular and Cordova

Understand Agile methodology and instill best practices into the process

Looking to work with cutting-edge technologies, increasing my skill base

### Areas of expertise

- Javascript
- Angular JS and Angular

---

## EXPERIENCE

### Software Engineer, TCS

Hyderabad, India — 2013-PRESENT

#### Accomplishments

- Implemented reusable grid in Angular 2 with pagination, sorting
- Optimized application for maximum speed and scalability by implementing one time binding and reducing watchers in AngularJS 1 application
- Developed reusable components including but not limited to Accordion, Collapsible, Navigation bar, 'clear-icon' directive for cross browser compatibility and 'custom-validation' directive for reusable validations
- Implemented one end-to-end application with RESTful API and AngularJS
- Managed administration of subversion server
- Participate in discussions with clients and team members about technical best practices and help teams identify optimal technical solutions
- Work with client services and the design team, and manage time across multiple projects in a deadline-driven, team environment
- Continuous Learning Program Faculty award four times for conducting training sessions on AngularJS 1, Object oriented Javascript and Apache Cordova
- Technical Excellence award for implementing own excel like editing feature as an alternative to licensed plugin

---

## ACHIEVEMENTS

**Technical Excellence** award

**Continuous Learning Program**

**Faculty** award four times.

---
